PROFILE

Statistics undergraduate with academic experience analyzing synthetic marketplace risk signals.

RELEVANT PROJECTS

Storefront Risk Signals | Academic project using synthetic data

Used SQL and Python to analyze 40,000 synthetic marketplace orders and identify anomalous refunds.

Built a logistic-regression risk-screening prototype; no production deployment is claimed.

LLM Support Triage | Academic project using synthetic questions

Built a local retrieval and evaluation prototype and compared answer-grounding failures.

EXPERIENCE

Fictional Market Lab | Data Analysis Intern | May 2025 - August 2025

Presented weekly findings to two research mentors and incorporated review notes.

EDUCATION

Northbridge Institute of Technology (fictional) | B.Sc. Statistics | Expected June 2027

SKILLS AND AVAILABILITY

Tools: SQL, Python, spreadsheets

English: professional working proficiency (self-reported)

Availability: September 2026 - December 2026 (four consecutive months)
